SPALDING SPECIFICATIONS

DATE: 01/01/06

MODEL NUMBER: 302500 Series

DESCRIPTION: Wall-Braced Backstop - Stationary

SPECIFICATIONS:

The Wall-Braced Stationary Backstops shall have four (4) 2" SQ. structural steel tubing extensions. The tubing shall be braced, when necessary, with precision cut 2" SQ. structural steel tubing braces.

The extensions shall end at fabricated ¼" steel flanges for attachment to 2" x 6" No.2 Danish oiled wallboards. The hinges shall be mounted to the wood wallboards with hardware such that the wood will not be counter-bored. An attachment system that requires the wood to be counter-bored will not be approved as equal.

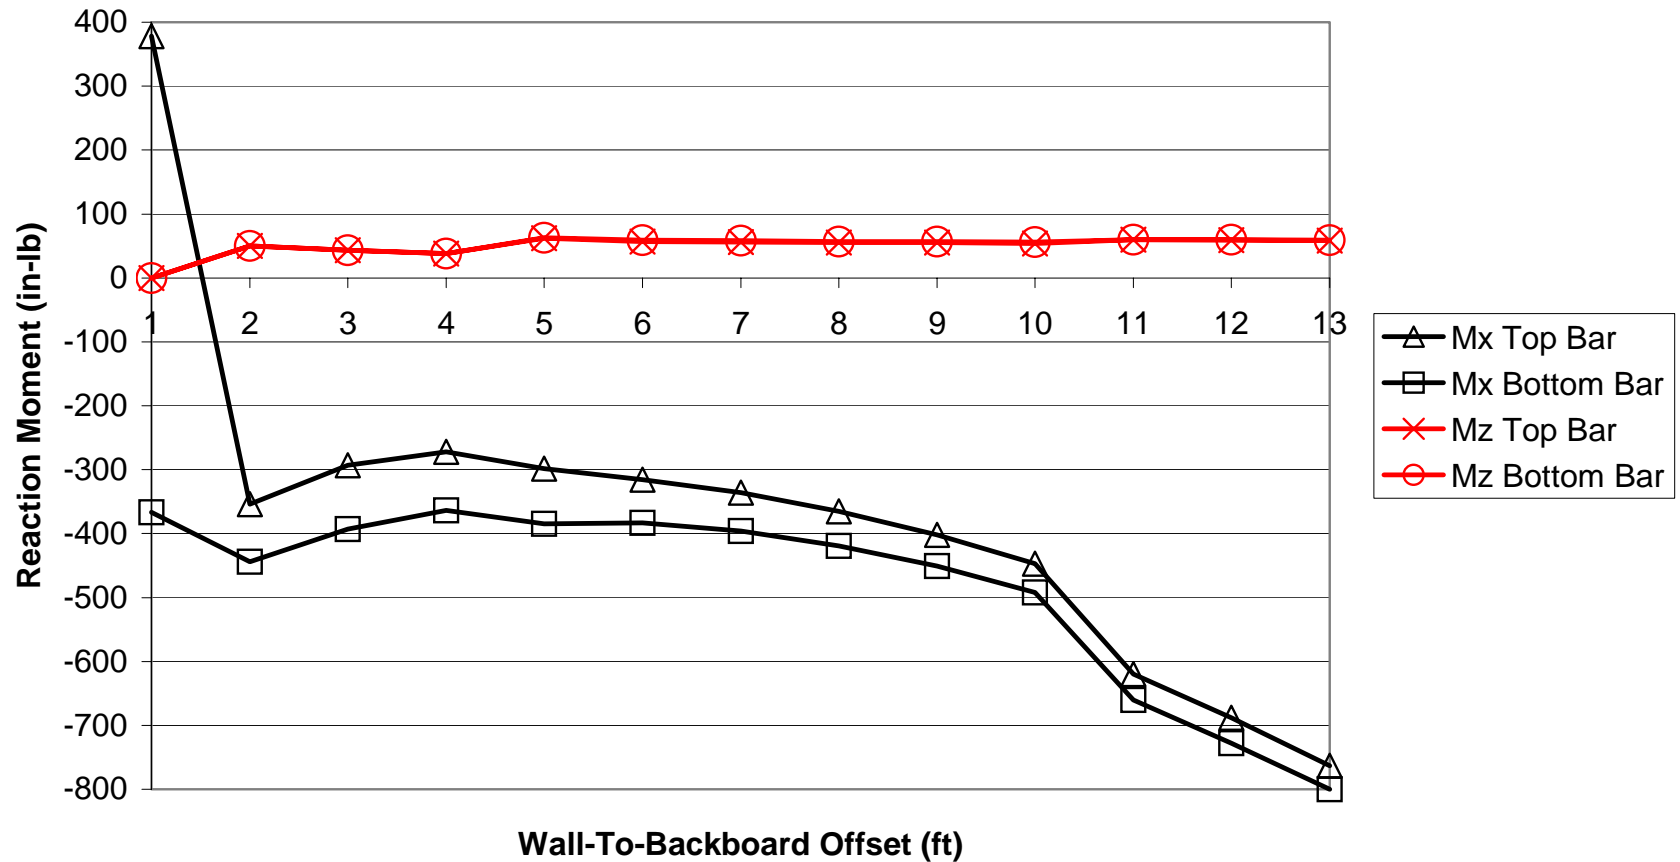

Tubing extensions shall be supported by ¼" aircraft cable extending diagonally from the wall to the upper extension pipes. The cable shall be attached to the extension pipes (saddle eyebolt weldment) using two cable clamps per attachment. The use of eyebolts and/or turnbuckles shall not be approved as equal.

Tubing extensions and components shall be factory finished with an electrostatically applied powder coat finish with custom colors available.
